

Executive Integrated Medical Management Program

Chulabhorn International College of Medicine, Thammasat University

Health & Wealth Institute: H&W

Chulabhorn International College of Medicine, Thammasat University, sees that administrators in the fields of medicine, dentistry, pharmacy, nursing, sport medicine, as well as those from public and private sectors with interest in medicine business should receive knowledge to improve and restore their experience to create organization managers with vision and able to think critically and acknowledge the globalization. Through connection, they will be ready for changes and success of their organizations in terms of innovation in the field of **medicine business**, nursing and other innovations. Organization managers can operate effectively in relative to the social status and ever-changing environment in addition to serving the society. Therefore, Chulabhorn International College of Medicine, Thammasat University, has created this Executive Integrated Medical Management Program.

Principle and Reason

The role of personnel in the fields of health and health development, nursing management, and integrative health development for healthier lifestyle and better quality of life for people in society is important and even more so in the present. Development of organizations and personnel to understand and keep up-to-date with the changes in society as well as adequately prepared for the changes is crucial. This can be achieved by organized integrated knowledge management system in addition to development in various services, progressive health promotion, and better understanding and knowledge of medicine business between administrators from both in and outside the fields of medicine from this program.

Vision:

Beauty Wealthy Healthy Hearty (BW2H) Together

Mission:

1. Build understanding in health promotion
2. Create learning and understanding in beauty from innovative medicine of Thailand 4.0
3. Give knowledge in operating and managing medicine business both in terms of business and investment
4. Develop psychological strength to live happily with good moral in the society
5. Make connection between personnel and organizations in the fields of medicine, business, and organization administrators both from public and private sectors including investors with interest in medicine business

Objective of the Program

1. Encourage students to have knowledge, understanding, and thinking in the new direction of medicine business which correlated with current situation

2. Create opportunity in exchanging knowledge and experience between students in the fields of medicine, business, and administrators both from public and private sectors in addition to honored speakers
